App-specific behavior (zoom on maps, cycle gauge screens, etc).

Press to go back one level or close pop-up. Also cycles screens.

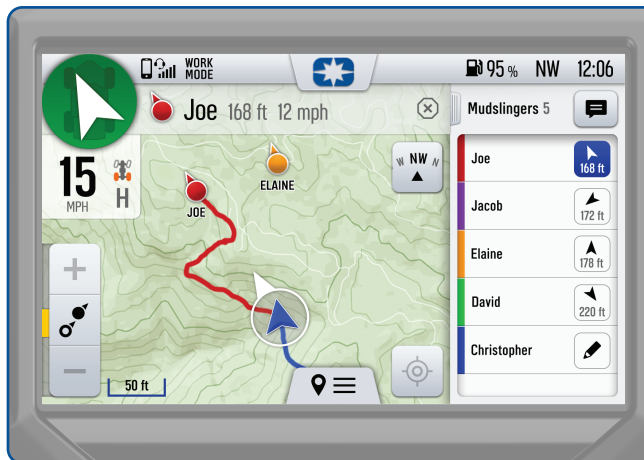

App-specific behavior (zoom on maps, cycle gauge screens, etc).

## Customize

Tap to customize up to four gauge screens and choose the ride and vehicle information for each.

## Group Ride

Group Ride shows the live location of riders in your group. Tap the message icon to view or send messages to others.

To create a ride group:

- 1 Go to the map.
- 2 Tap at the bottom of your display.
- 3 Tap "Group Ride."
- 4 Create or join a group.

## Update Map and Trails

- 1 On a computer, go to: [ridecommand.polaris.com/display](http://ridecommand.polaris.com/display)
- 2 Select your display and choose which geographic region to load.
- 3 Follow instructions to **Download** the map of your desired region and **Install** it on your vehicle via USB drive.

The maps, trails, and point of interest data are updated daily, so check back often to keep your display up to date.

### Apps & Controls

Tap to access all apps, vehicle controls, and settings.

### Maps

Maps with your rides and places, navigation, and group ride.

Join a group to see your friends on the map.

### Music

USB and Bluetooth media streaming.

### Phone

Connect your phone or headset via Bluetooth to make phone calls and send messages.

## Update Software

### Over-the-air Update

- 1 Connect the vehicle to Wi-Fi or a personal hotspot. When a software update is available, a notification will be shown.
- 2 **Download** and **Install**.

The update can also be installed via USB drive by visiting [ridecommand.polaris.com/display](http://ridecommand.polaris.com/display)
